## **Introducing LEC's Chem-Rod with the new EZ Cap!**

You asked, we listened...

The new EZ Cap for Lightning Eliminators' Chem-Rods makes it easy for you to remove the cap to refill your Chem-Rods season after season with no additional tools required. Chem-Rods with the new EZ Cap come equipped with a standard 4/0 stranded copper pigtail for reliable exothermic ground connections. The EZ Cap also has a lug which can be used for auxiliary bolted grounding connections such as secondary ground connections, temporary connections and ground interface testing. The new EZ Cap maintains the same UL Listing that our Chem-Rods have always had.

While we have improved the functionality, appearance, and connection options of our Chem-Rods, we have not increased the cost to our customers! We hope you enjoy our Chem-Rods with the new and improved EZ Cap. If you have any questions or comments please feel free to call Lightning Eliminators at 1-800-521-6101 or email us at [info@lecglobal.com](mailto:info@lecglobal.com).
